

## School Council

School Council have been learning new skills this term and have been engaged talking about a range of topics. They have been building rapport and gaining confidence in talking in a group.

School Council have learned how to make decisions and have a good understanding that other members of the group may have a different opinion.

Justin asked for their help in choosing artificial grass - they all felt the different grass textures and had to choose from three - short, medium and long. At first they liked the short grass, but when they thought about sitting and playing on the grass, they said the short grass was 'too rough'. They went on to choose the long grass because it was 'soft'. Some of the new grass has already been laid outside Rainbow Class and School Council went over to Rainbow to try out the grass. They were joined by 'the little ones' and all had a great time interacting with each other.

School Council gave the grass

Green Class asked School Council to speak to Tracey (our school cook), to ask if they could have different choices at lunchtime. They are working with Tracey on having different fillings for jacket potatoes.

School Council helped interview a new teacher. They were very good at asking questions, listening and answering questions - using speech, sign, symbols and switches. They were confident in their decisions about which candidate they liked and why.
