

Green Class

It has been a really hot and busy term and the children have really engaged in their learning.

In science we have really 'gone green' and have learnt all about plants, as well as growing our own and linking it to our DT lessons by making mini greenhouses. The children have loved experimenting and finding out about factors that affect growth.

We really enjoyed our class trip to the Living Rainforest, which has supported the children's learning about plants. There was also lots of experimenting on Science Day, which was immense fun and really engaged the children.

In English we have been studying 'George's Marvellous Medicine', which has definitely been a hit with the children, who eagerly look forward to each new chapter and acting out parts of the story with props.
