

# Green Class

Summer term is always busy and this one has been no different. Alongside our usual learning we have packed in sports day, science day, horse riding open day, Linkenholt adventure day and circus arts week-Phew!

The glorious weather has enabled us to take our learning outside of the classroom and engagement levels have remained high despite the heat.

We returned victorious from our day at Linkenholt which is a huge achievement. It is only our second year of attending and the children should be very proud. It was a fantastic day where the children experienced birds of prey, working dogs, sheep shearing, bug hunting and identification, bread making and giant moths to name a few.

The pupils have loved learning about different forces in science. Pushes and pulls at the park were a favourite. The science day was a real hit and everyone enjoyed changing the states of materials-particularly chocolate!

Have a wonderful fun packed summer from everyone in Green Class. Let's hope the sun keeps on shining!
