

# Green Class

It has been another busy term with sports day, Italian language day, the amazing Wonderdome and visits to Marwell and the community allotment-all enhancing our learning.

Lots of space themed activities followed on after the visit from the Wonderdome. We had rocket races, made moon sand, looked at how craters are made on the moon and we even did our own moonwalk!

Our topic in science this term has been plants and we have grown our own beans as well as helping out at the community allotment.

The best bit about helping at the allotment? Identifying and tasting all the different produce-we found blueberries, strawberries, redcurrants and raspberries! Mmmmm very tasty!

The pupils want to say a big thankyou to the Rotary Club who organised our Kids day out at Marwell Zoo. It was a great day enjoyed by all.

Have a wonderful and fun packed summer from everyone in Green Class.
