

## Class 4

This term, Class 4 have been learning all about mini-beasts. We made moving mini-beasts in design technology lessons, went on mini-beast hunts and we even made our own superbugs on the interactive whiteboard!

The children have been learning to programme robot bees and building courses for them to navigate around.

We have also been out in the local community visiting the Mug and Biscuit to see the great art exhibition. There were fantastic comments in the guest book about all of the different art work.

We also visited Oakley Junior School for a fun day organised by their Year 6 pupils. Everyone had a great time. There was face painting, cake decorating, lucky dips and many other stalls.
