

# Blue Class

Blue class have been learning about forces in science. We went to the park when we had to investigate whether we needed to push or pull the play equipment in order to make it move. We also visited the Look Out Science Discovery Centre in Bracknell where we learned about air pressure, forces and motion, gravity, weight, reflection, problem solving, sound and light. It was very practical and we all enjoyed getting involved. Some of us also climbed a very high 'Look Out' Tower. This was great fun but a little scary! Afterwards we had a little bit of time to develop our social and physical skills in the adventure playground.

In other news we have been learning about China this term. Cue lots of opportunities to taste and cook a variety of different foods, yum yum! Our chopping skills are definitely improving as we have chopped a range of vegetables for our stir-fry and spring rolls.

Our topic work on the Victorians led to a Victorian school experience - dressing up, using slates and trying out old and new toys.
